PROFESSIONAL SUMMARY

Entry-level Java developer with internship experience building and maintaining applications in Core Java, Spring Boot, REST APIs, and MySQL. Comfortable with OOP, data structures and algorithms, and database work, and practiced at testing, debugging, and exception handling. Familiar with securing APIs through JWT authentication. Looking to join a team where I can contribute to real software projects and keep growing my Java skills through hands-on work.

WORK EXPERIENCE

Java Full Stack Developer Intern - DVein Innovations Pvt Ltd Jan 2026 - Apr 2026

- Built core modules of a Course Enrollment and Management System using Java, Spring Boot and MySQL, increasing enrollment efficiency by 25%.
- Engineered 50+ RESTful APIs secured with JWT authentication and Role-Based Access Control (RBAC) to ensure robust system security.
- Designed normalized MySQL schemas, improving data integrity and increasing query efficiency by 30%.
- Maintained Java Spring Boot application modules, performed debugging and testing, and implemented input validation and exception handling to improve code quality and application reliability.

Data Analytics Intern - Retech Solution Pvt Ltd Jun 2025 - Aug 2025

- Analyzed 10K+ rows of supermarket sales data using SQL, MySQL, Excel, and Power BI to identify sales trends and optimize inventory insights.
- Constructed 5 interactive Power BI dashboards and SQL-based reports, supporting data-driven decision-making and reducing reporting time by 20%.

PROJECTS

Course Enrollment and Management System

- Engineered and architected a full-stack application independently, with a Spring Boot backend and React.js frontend, augmenting system speed by 25%.
- Implemented RBAC, JPA/Hibernate integration, input validation, and centralized exception handling to secure 50+ API endpoints for production-style deployment.

AI-Based Patient Flow Prediction and Hospital Resource Management

- Built an LSTM time-series forecasting model to predict patient inflow with 90% accuracy, supporting effective hospital resource allocation.
- Performed exploratory data analysis (EDA) and feature engineering, increasing model prediction accuracy by 15% and validating results.
- Integrated MySQL and REST APIs to support scalable automation of healthcare workflows, improving query execution time by 30%.

EDUCATION

University College of Engineering, BIT Campus, Tiruchirappalli May 2026

Bachelor of Engineering, Computer Science and Engineering | CGPA: 7.5

- Relevant Coursework: Data Structures, Algorithms, DBMS, OOP, Operating Systems, Computer Networks

SKILLS

Programming Languages: Core Java, Python, C
Frontend: HTML5, CSS3, JavaScript
Backend: Spring Boot, Spring Security, RESTful APIs, JWT Authentication, JPA/Hibernate, API Design
Databases: SQL, MySQL, PostgreSQL
Tools and Platforms: Git, GitHub, GitHub Actions, Maven, Postman, Docker, IntelliJ IDEA, VS Code, CI/CD Pipelines
Core CS Concepts: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design, Writing Clean Code.
Languages: English: Fluent, Tamil: Fluent, Hindi: Limited Working Proficiency

CERTIFICATIONS

Java Full Stack Development Certification | Data Analytics Certification
